Summary

Full-stack and IoT engineer focused on building reliable web applications and hardware-integrated systems. Experienced with React, Node.js, TypeScript, and ESP32, delivering real-time dashboards, scalable services, and user-centered interfaces. Known for clean architecture, strong execution, and cross-functional collaboration.

Experience

9Call Company

Project Manager & Frontend Lead

Kigali, Rwanda

2026 - Present

- Leading a 6-person cross-functional team building WCAM, an IoT water monitoring platform for rural communities
- Owned system architecture, integrating ESP32 firmware with a React dashboard
- Delivered real-time dashboards and a 3-tier RBAC security design

The Gym Rwanda

Software Engineering Trainee

Rwanda

2025 - Present

- Training on React, TypeScript, Node.js, and system architecture through project-based delivery
- Collaborated on full-stack features and UI workflows with focus on code quality

Projects

WCAM (Water Community Administration & Monitoring)

Private (request access)

- Developed a full-stack IoT platform pairing ESP32 microcontrollers with flow sensors
- Engineered a leak-detection algorithm flagging anomalies via real-time delta tracking
- Tech: Node.js, React, TypeScript, Socket.io, MySQL, ESP32

SPCMS (Smart Power & Cooling)

GitHub

- School platform for power usage control and equipment protection with Spring Boot and JSP
- Tech: Spring Boot, Spring Security, JPA, JSP, MySQL

ElevateLink

Live Demo — GitHub

- Mentorship platform built with PHP, MySQL, and TailwindCSS for learner guidance
- Tech: PHP, MySQL, Tailwind CSS

Capgemini Clone

Live Demo — GitHub

- Responsive marketing site clone focused on layout precision and UI consistency
- Tech: HTML, Tailwind CSS, JavaScript

Education

RP Kigali College

Bachelor's in Information Technology

Kigali, Rwanda

2022 - 2025

- Focused on software engineering, embedded systems, and database architecture

KOICA Program

IoT & Embedded Systems Training

Rwanda

2025

- Placed 1st in IoT project team competition and 2nd in overall game challenge

Skills

Languages: JavaScript (ES6+), TypeScript, C++, Python, HTML5, CSS3

Frontend: React.js, Next.js, Tailwind CSS, Vite, Redux

Backend: Node.js, Express.js, RESTful APIs, Supabase, MySQL/MongoDB

Tools: Git, Docker, Vercel, Postman, ESP-IDF, Arduino IDE
