PROFESSIONAL SUMMARY

Junior full-stack developer (React, TypeScript, NestJS, PostgreSQL) with a year of structured training at The Gym Rwanda. Built a full-stack car-sharing platform in an Agile team, shipped sections of a company website, contributed to an open-source community project, and won 1st place at the KOICA Rwanda IoT Project Competition 2025. Seeking a junior or entry-level role, remote or hybrid.

TECHNICAL SKILLS

Languages: JavaScript, TypeScript, HTML, CSS, SQL

Frontend: React, React Router, Redux, Context API, Tailwind CSS

Backend: Node.js, NestJS, REST APIs, Authentication & Authorization (role-based access)

Database: PostgreSQL, MariaDB

Testing: Jest (unit and integration testing)

Tools & Practices: Git, GitHub, Docker, Netlify, Trello, Toggl Track, Agile/Scrum, code reviews, pair programming

EXPERIENCE

Software Engineering Trainee, The Gym Rwanda 2025 – Sept 2026

- Completed a 1-year, GIZ-supported Core Skills program in full-stack JavaScript/TypeScript: React, Node.js/NestJS, PostgreSQL, Docker and Jest.
- Worked in an Agile/Scrum team: broke requirements into tasks on Trello, and used GitHub pull requests, code reviews and pair programming.
- Delivered the Car Sharing Platform across frontend and backend (see Selected Project).

Co-Founder, Project Manager & Full-Stack Developer, 9Coll Ltd 2026 – Present

- Built the About, Who We Are, Projects, Mission and Footer sections of the company website using React and Tailwind CSS.
- Contribute to frontend and backend development across company projects, turning requirements into responsive, reusable interfaces for mobile and desktop.
- Co-founded 9Coll and serve as Project Manager, coordinating tasks, delivery and progress updates across the development team.

Frontend Contributor (Volunteer), Open Source Kigali Open source

- Added loading states to the Events, Community and Projects pages of the OSK community website (React, TypeScript, Tailwind CSS); pull request reviewed and merged.
- Worked in an existing, active codebase through Git and GitHub.

SELECTED PROJECT

Car Sharing Platform React, TypeScript, NestJS, PostgreSQL, Docker

Team project at The Gym Rwanda. Private repository; demo available on request.

- Frontend: built the booking flow (book a car, accept or decline requests) and the available-cars view.
- Backend: implemented authentication in NestJS to secure access to the API.
- Built the booking endpoints (POST and PATCH /booking) and car creation endpoint (POST /cars) on PostgreSQL.
- Implemented role-based access control so each user role can only perform permitted actions.

ACHIEVEMENTS

- 1st Place, KOICA Rwanda IoT Project Competition, 2025
- 2nd Place, KOICA Rwanda Overall Challenge, 2025

EDUCATION & CERTIFICATION

Bachelor's Degree in Information Technology, RP Kigali College 2024 – 2027 (expected)

Phase 1 / Core Skills Training, The Gym Rwanda Completed Sept 2026

1-year program supported by the German Development Cooperation (GIZ).
